

About the Peace Table

[The Peace Table](https://medium.com/the-peace-table)¹ is a Medium publication devoted to advancing humanity's understanding of self with a view towards achieving peace at all levels.

The idea for this publication came from a life-changing vision [Abraham Maslow had just a day after the Pearl Harbour attack](#). On that day, as he shed tears over humanity's lack of understanding, Maslow had a *vision* of a peace table, a place where he saw people sitting around and talking about “*human nature and hatred and war and peace and brotherhood...*” and all the things needed to truly understand human beings and finally make real progress forward. Unfortunately, he died before he could establish that table.

In this publication I want us to run with his idea, to talk about the things mentioned above and more. To goal is to provide concepts, ideas, theories, explanations and guidance on what we need to do to stop this planet's accelerating downward spiral.

This publication will be the forward face of the organization.
